EBONY BROWN

Software Engineer **Fullstack Developer**

PERSONAL PROFILE:

I am a process driven software developer that loves finding and solving problems. I enjoy the process of taking big ideas and making them into functioning apps and sites. I love collaborating with developers as well as explaining code and functionality to clients. As a fast learner, I welcome new challenges especially with technology I'm not familiar with.

PROFESSIONAL SKILLS:

- HTML5 + CSS
- JS + JQUERY
- VUF
- NODE
- EXPRESS
- MONGODB + MONGO ATLAS
- MONGOOSE
- RUBY + RAILS REST API DEVELOPMENT
- SQL
- HFROKU
- PYTHON + DJANGO API DEVELOPMENT
- AWS S3
- DBEAVER

TECHNICAL EXPERIENCE

SOFTWARE ENGINEERING FELLOW

General Assembly July 2020 - Oct 2020

- Worked for 12 weeks and gained over 500 hours of intense Fullstack Development training.
- Worked 9-5 to create 5full CRUD applications using various Front and Backend technologies such as JavaScript, Node, Ruby, Rails, SOL and Python.
- Created Fullstack applications under a strict deadline.
- Collaborated on a travel application in a 5 person team.

PROJECTS

Portfolio Control Panel: https://ebsportfoliocontrol.netlify.app/

An application where artist can upload, edit and delete their pieces within a database and sort them by type. The application was created using Javascript, Express, Mongoose and AWS S3 API.

Vooyage: https://vooyage.netlify.app/

A travel app that suggest interesting locations to visit in a select amount of cities. This was a collobarative project when I worked mostly on the front end Mapbox, as well as the http request to our api. I assisted with a few of the rails routes and models

Recreation: https://competent-wescoff-5ebab2.netlify.app/#/ A gaming eCommerce app inspired by sites like the PlayStation store and Origin. It was made using Python, Django and Vue. Unlike Vooyage it uses components, routers and views on the frontend rather than just a vue instance.
